

MAYHEM *of* LOOPS *v1.5*

Software User Manual

Software Version 1.5
EN 150915

End User License Agreement (EULA)

////////////////////////////////////

Do not use this product until the following license agreement is understood and accepted. By using this product, or allowing anyone else to do so, you are accepting this agreement.

Mayhem of Loops (henceforth 'the Product') is licensed to you as the end user. Please read this Agreement carefully. You cannot transfer ownership of these Sounds and Software they contain. You cannot re-sell or copy the Product.

LICENSE AND PROTECTION

1. License Grant

UVI grants to you, subject to the following terms and conditions, a non-exclusive, non-transferable right to use each authorized copy of the Product.

The product is the property of UVI and is licensed to you only for use as part of a musical performance, live or recorded. This license expressly forbids resale or other distribution of the sounds and software included in the Product or their derivatives, either as they exist on disc, reformatted for use in another digital sampler, or mixed, combined, filtered, resynthesized or otherwise edited, for use as sounds, multi-sounds, samples, multi-samples, wavetables, programs or patches in a sampler, microchip or any hardware or software sample playback device.

You cannot sell the Product content or give it away for use by others in their sampling or sample playback devices. In the event UVI terminates this agreement due to your breach, you agree to return the original and all other copies of the software and documentation to UVI.

UVI reserves all rights not expressly granted to herein.

2. Protection of Software

You agree to take all reasonable steps to protect the product and any accompanying documentation from unauthorized copying or use. You agree not to modify the product to circumvent any method or means adopted or implemented by UVI to protect against or discourage the unlicensed use of copying of the Product.

3. Ownership

As between you and UVI, ownership of, and title to, the enclosed digitally recorded sounds (including any copies) are held by UVI. Copies are provided to you only to enable you to exercise your rights under the license.

4. Term

This agreement is effective from the date you open this package, and will remain in full force until termination. This agreement will terminate if you break any of the terms or conditions of this agreement. Upon termination you agree to destroy and return to UVI all copies of this product and accompanying documentation.

5. Restrictions

Except as expressly authorized in this agreement, you may not rent, sell, lease, sub-license, distribute, transfer, copy, reproduce, display, modify or time share the enclosed product or documentation.

6. Hardware

The accompanying USB flash media is only guaranteed in its original state, as an installation medium for the Product. Any variance from this use including but not limited to deleting, altering or adding data, reformatting the media or any physical alteration of the device will void its warranty. If the media is found to have a physical or manufacturing defect please contact our support department (<http://www.uvi.net/contact-support>).

Introduction

////////////////////////////////////

Mayhem of Loops 1.5

Premium Loop and Construction Kit Archive

Mayhem of Loops 1.5 delivers a massive collection of high-quality, professionally treated samples including over 8,000 loops covering dozens of musical instruments, playing techniques and genres. From crisp and modern to dirty underground vibes, drums, breakbeats, solo instruments, effect loops, vocal cuts, all ready to play or be stretched, sliced and molded into new forms. MoL provides a huge arsenal of tempo-synced material for producers in a convenient and affordable package.

Assembled in our Paris studio, MoL has been enhanced with an additional 3,000+ samples. Perfectly trimmed and mastered to perfection these loops sound amazing straight-away but can be easily manipulated and twisted to taste. With UVI Workstation you can effortlessly stretch loops, create slices, layer sounds and add effects

[nearly 50 available, including delays, reverbs, dynamics, saturators, beat repeat and vinyl effects]. Drag-and-drop slices as MIDI into your DAW, or drag the wav files to your DAW for further editing (even stretched audio, if enabled). All loops stay in tune and synced to host tempo thanks extensive meta tagging and UVI Workstations high-quality realtime time-stretching algorithms.

Mayhem of Loops includes a comprehensive selection of sounds covering genres such as: Blues, Hip-Hop, Electro, House, Drum'n'Bass, Trip Hop, Big Beat, Breakbeat, Creative Dub, Fresh Disco House, Grunge Hip-Hop, Industrial, Jungle, Underground Hip-Hop, Ragga, Dub, Roots Disco, Roots Funk, Speed R&B, UK House and more. Whether you're looking for something specific or just inspiration, Mayhem of Loops gives you a huge archive of sounds to explore in a creative and easy-to-use environment.

System Requirements

Compatibility

Audio Units, VST, MAS, RTAS, AAX or standalone
UVI Workstation 2.5.15 or higher

Minimum System Requirements

- ▶ Intel CPU
- ▶ 4 GB of RAM (8 GB+ recommended)
- ▶ 7 GB of disk space
- ▶ Mac OS X 10.7 or higher
- ▶ iLok account (free, dongle not required)

Compatibility

VST, RTAS, AAX or standalone
UVI Workstation 2.5.15 or higher

Minimum System Requirements

- ▶ Core Duo or faster
- ▶ 4 GB of RAM (8 GB+ recommended)
- ▶ 7 GB of disk space
- ▶ Windows 7 or higher
- ▶ iLok account (free, dongle not required)

Authorize the Way You Want

Your license allows 3 concurrent authorizations on any combination of computers and iLok dongles.

License management is a simple drag-and-drop process done through iLok License Manager.

Visit ilok.com/en to download iLok License Manager and create your free account.

Step 1 Register Your Serial Number

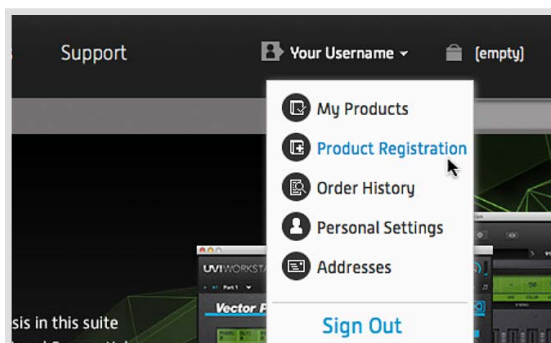

1 2 3 4

- ▶ You must have an account on uvi.net and ilok.com prior to registration
- ▶ If you purchased a **physical version** of this product, your serial number is located on the inside of the box
- ▶ If you purchased an **electronic version** of this product, your serial number will be included in a confirmation email
- ▶ You can see a list of the products you've registered and their serial numbers anytime at uvi.net/my-products

1. Login to your account on uvi.net

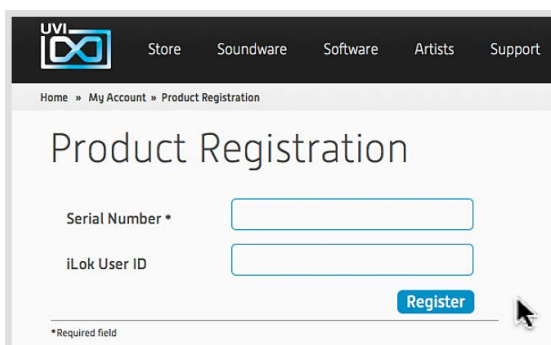

2. Navigate to the 'Product Registration' page

3. Enter your details and click 'Register'

Upon completion a new license will be deposited in your iLok account

Step 2 Activate Your License

1 2 3 4

- ▶ iLok License Manager is required for activation, download the newest version at ilok.com/ilm.html
- ▶ Your license allows up to 3 concurrent activations on any combination of iLok dongles and computers
- ▶ Activations can be moved between devices at anytime

1. Launch iLok License Manager

2. Login to your account

3. Click the 'Available' tab

4. Drag the license to your computer or an iLok dongle

5. Click 'Ok' to confirm the activation

The process is complete, your device is now authorized

- » To see how many authorizations you have left simply select the license and click 'Show Details'
- » To deactivate your license, right-click it and select 'Deactivate' — doing so will return your license to the 'Available' tab

Step 3 Install Your Instrument

1 2 3 4

- ▶ UVI Instruments can be stored anywhere on your system
- ▶ Storing your instruments on a fast drive will improve performance
- ▶ Your instruments can be downloaded at any time from uvi.net/my-products

1. Create a folder on your computer and place your UVI Instruments in it
Once this is done we need to tell UVI Workstation where to find your instruments.
We do this by creating a watch folder, follow the steps below to create your own:

2. Open UVI Workstation

3. Click the Settings page

4. Click the 'Sound Banks' tab

5. Click the '...' button and select the folder where you've placed your instruments

6. Restart UVI Workstation and open the Browser

Your instruments will be available under the 'Soundbanks' tab

Step 4 Load Your Instrument

1 2 3 4

- ▶ UVI Workstation is required to run UVI Instruments
- ▶ The newest version of UVI Workstation can be downloaded free at uvi.net/downloads
- ▶ UVI Workstation can be run as a standalone program or as a virtual instrument from within your DAW of choice

1. Open UVI Workstation

2. Click the Browser icon

3. Open the Sound Banks tab

4. Select a product, in this example we'll choose Vector Pro, then select an instrument and patch

Double-click the patch to load it

5. The UI appears and you're ready to jam!

Browser

1 View Toggle

» Single-Part View

Selected instrument's UI/parameters

» Multi-Part View

Add and select various instrument layers

» Preferences View

General, streaming, and sound bank

» Browser View

View and load instruments

2 Category Column

26 sample categories are available to choose from

3 Groups

Groups are indicated with an arrow

'>', click to view their contents in the adjacent column

4 Samples

Samples are typically named as follows:

Tempo > Set > Description/Pitch

5 Details

Meta-data for the instrument and file are displayed here

Sample Editor

1 ► Playback Behaviors

» Sample

Loop/phrase plays like a regular sampler
NOTE: Half/Double speed does not work in Sample mode

» Stretch

Sample length is not pitch-dependent.
Loop/phrase starts at the beginning of the loop/phrase

» Slice

Default mode

NOTE: Sliced soundfiles can be switched to Stretch or Sample, but non-Sliced soundfiles cannot be switched

2 ► Controls

» Key, Tempo

Key displays the root key for the loop/phrase, Tempo controls the loop's rate

» Coarse, Fine

Adjust tuning in semitones or cents

» Sync

Off: Loop/phrase does not sync to tempo
Tempo: Follow Tempo, but not position
Position: Tempo and position are followed. **NOTE:** Not available to phrases.

» Speed

Adjust speed in relation to Tempo and Sync settings, Double-click to reset,
Half/Double: Slow to 1/2 or 1/4; Speed to 2x or 4x of the assigned tempo, Fine works similarly, but with any rate value

» Latch

The loop/phrase will play even after you release a controller key
Stretch/Slice: it will repeat indefinitely
Sample: it will play once, then stop
NOTE: hit the same controller key again to silence the loop/phrase

» Trigger

Immediate: instantly triggers
Next Beat: triggers on beat
Next Bar: triggers at measure

» Slice Start

Sample/Stretch: define where the sample will begin within the soundfile
Slice: provides a range from the first slice of the sample to the last slice

» Drag & Drop

Export raw wave, when Slice/Map is enabled exports MIDI map of sliced sample notes

3 ► Transport

Tempo editable via tap, click-drag, or manually entry via double-click, stop, sync-to-host, play

Effects

1 ► Preset Part

Add, remove, change (Right-click or double-click) or manipulate effects

» Preset

Displays the effects built into the preset

NOTE: Used for instrument presets only

» Part

Apply effects to the part

2 ► Effect Parameters

Each effect has a unique set of parameters visible here

NOTE: Arrows at the right edge of the screen appear if an effect has more than five parameters, use these arrows to scroll through all available parameters

3 ► Sync, Bypass, Delete

Sync: sync effects to host tempo

Bypass: bypass effect

Remove: delete effect

Arpeggiator

Arpeggiators can act as a pattern gate, arpeggiator, or even an advanced rhythmic processor for your live MIDI performance or sequenced MIDI tracks.

Arpeggiators can be inserted in an unlimited number of parts.

1 ► Enable, Save, Preset

» Save

Customized arpeggiator settings can be saved and used in other parts or songs

» Preset

Choose a preset arpeggiator pattern

2 ► Steps

The display is completely interactive.

» Enable / Disable

Click the box below the blue bar

» Merge

Shift-click box below the blue bar

» Velocity

Click and drag the blue bar up or down

» Length

Shift-click and drag the blue bar left or right

3 ► Parameters

» Trigger Mode

Legato: first note starts at first step, pattern will restart from the first step when notes are released and next notes are triggered

Song Position: song position always determines the pattern position

» Repeat Button

The bottom note is repeated

» Repeat Top

The top note is repeated

» Hold

Notes are held

» Mode

Determines the order notes are played

» Resolution

32 bar to 1/64 triplets range

» Octave

Number of octaves below and above notes to be played

» Step Length

Globally effects the length of all steps. For example, a step set to 50% and a knob setting of 50% will cause the step length to become 25%.

» Num Strike

The number of times a note will trigger before proceeding to the next note

» NumSteps

Assign from 1 - 128 steps

» Groove Amt

Apply a swing by slightly altering the trigger time to the steps

» Arp Vel Blend

Control the depth of the steps' velocities

Part Mixer

1 ► Globals

- » **Menu (wrench icon)**
Load, save or reset the current multi
- » **Add Part (+ icon)**
Add a new part to your multi
- » **Delete Part (- icon)**
Remove a part from your multi

2 ► Part List

- » **MIDI IN monitor**
- » **Audio OUT monitor**
- » **MIDI IN Port**
- » **Preset Previous, Next (<>)**
- » **Part Name**
Double-click to open browser, use the left/right arrows to change the patch

3 ► Mixer

- » **Mute**
- » **Solo**
- » **Volume**
- » **Pan**
- » **Aux 1 & Aux 2**
Establish amounts of effects from Aux 1 or 2 buss effecting individual parts
- » **Polyphony**

4 ► Pitch

- » **Octave (oct)**
- » **Semitone (semi)**
- » **Finetune (cents)**

5 ► Effects

- » **Preset Effects**
These effects are mirrored in the instruments user interface

» Part Effects

Part-level effects

» Aux 1 & 2 Effect Busses

Effect busses, feed from any part

Master Effect Buss

Fed by all parts and effect busses

» Add FX / Change FX

Click [Add FX] to instance a new effect
Right-click or Double click an effect to change it

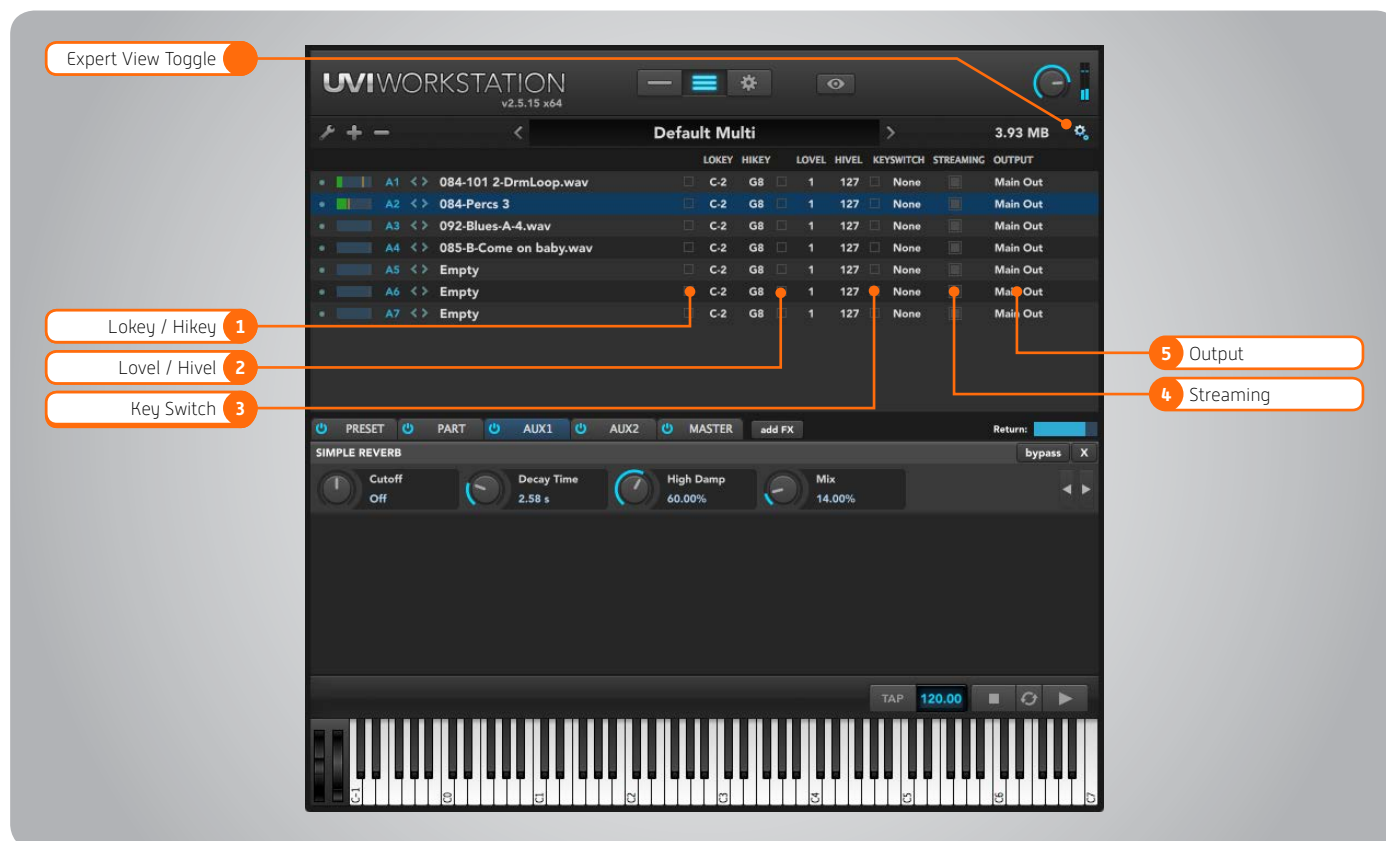

» Sync, Bypass, Remove

Sync: sync time-based effects to host tempo

Bypass: bypass effect

Remove: delete effect

Expert View

1 ▶ LOKEY / HIKEY

Adjust the playable key range by setting upper and lower key limits

2 ▶ LOVEL / HVEL

Remap the incoming note velocities

3 ▶ Key Switch

Assign a MIDI note to toggle parts on/off

4 ▶ Streaming [ON/OFF]

Rather than loading entire samples into RAM, samples are read from the hard drive as the preset is played

5 ▶ Output

Assign parts to the master stereo output or one of 16 additional stereo outs

» Note about Plug-In use:

If using as a plug-in, please consult your DAWs user manual for working with multi-out instruments

Tips + Tricks

MIDI Learn

Most UVI Workstation parameters can be automated via a convenient MIDI Learn. MIDI Learn allows you to bind a physical MIDI controller to specific parameters within UVI Workstation.

- Any FX tab parameter, Macro Knob or Slider in UVI instruments can use the MIDI Learn feature
- The MIDI controller type and the MIDI Channel assignment will be saved with the multi or with your song in the host sequencer
- Automation is assigned per-part

To use MIDI Learn: 1. Right-click the parameter in UVI Workstation that you want to automate 2. After the MIDI Learn dialog appears, Trigger the desired MIDI input controller (knob, fader etc.)

To remove a MIDI controller assignment: Right-click the desired parameter and press "Delete"

Remap knob range: Alt+right click parameter, choose CC, set remap range with slider

Unlimited FX

UVI Workstation offers a wide variety of FX, or effect processors, to cover all your audio processing needs. The FX implementation is robust and includes the ability to insert unlimited FX slots in several stages of the signal flow.

- Click the "FX" tab to open the FX page on the Single view
- In Multi view the FX section is always displayed

Arpeggiator

UVI Workstation comes equipped with a robust arpeggiator. To insert an arpeggiator in a part, you need to display the Single view in the UVI Workstation, then click on the note icon. The arpeggiator can be employed as a pattern gate, arpeggiator, or even an advanced rhythmic processor for your live MIDI performance or sequenced MIDI tracks. Arpeggiators can be inserted in an unlimited number of parts.

Preset Stacking

Thanks to the simplicity of the UVI Workstation you can stack as many preset as you want by simply assign multiple part on the same MIDI channel.

Split, Velocity & Key Switch

	LOKEY	HIKEY	LOVEL	HVEL	KEYSWITCH	STREAMING	OUTPUT
A1 <> 089-HB-Sticks 01a.aif	C-2	G8	1	127	C3		Main Out
A2 <> Analog Strings	C-2	G8	1	127	None		Main Out
A3 <> WerMa-Philli.aif	C-2	G8	1	127	None		Main Out
A4 <> Synth Bass & Synth	C-2	G8	1	127	C3		Main Out
A5 <> Jazzistic Guitar 4	C-2	G8	1	127	None		Main Out
A6 <> Lord Fulllight	C-2	G8	1	127	C3		Main Out

The Keyswitch settings allow you to load multiple presets into two or more parts and dynamically play and mute them from your MIDI controller using key switching, note range, velocity range or any combination of the three parameters. This powerful feature gives you a great deal of real-time control.

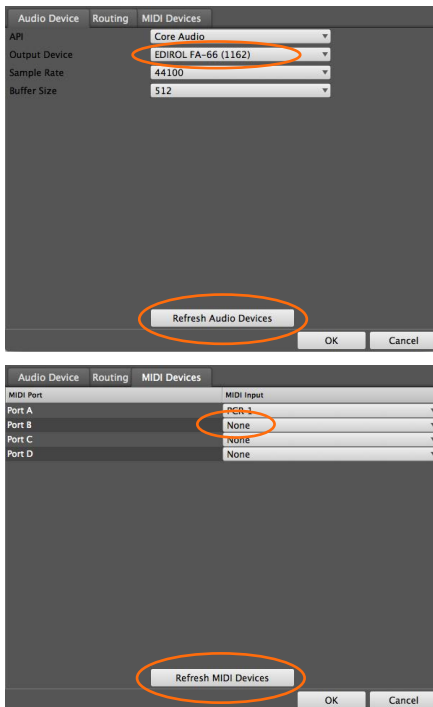

Scroll Wheel

All knobs can be adjusted with the scroll wheel on your mouse. When you double-click on any knob or slider, you can manually enter or type in the desired value.

Tips + Tricks

▶ Audio and MIDI Settings

Be sure to have your Audio/MIDI controller turned on and plugged in before launching UVI Workstation. If you do not hear sound or if your controller does not send signal, select file, then Audio MIDI Settings. You can also hit Refresh Audio/MIDI Devices to locate your devices.

NOTE: This is an example. You will need to locate your device names.

If these settings look accurate and you still do not hear sound or if your MIDI device still does not send signal, check the MIDI channel and port settings are correctly set:

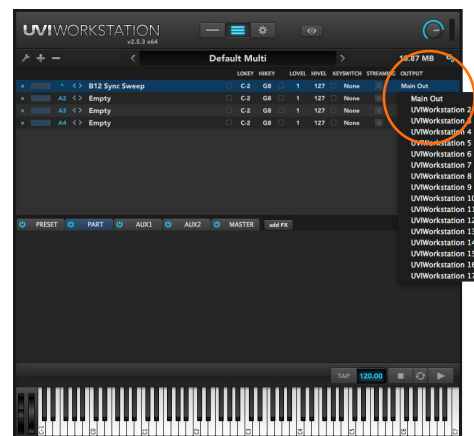

▶ Shortcuts & Key Commands

- ▶ Space Bar: play/stop
- ▶ Alt-click or Option-click: restore default parameter
- ▶ Right-click or Control-click: open the MIDI Learn dialog box
- ▶ Keyboard Arrows: navigate the browser

▶ Sample Buffer

If there's a delay before you hear a note, you'll need to set the sample buffer of your audio hardware driver to a low number. Experiment with this setting to get the best response and computer performance. You can change the buffer size by selecting file, then Audio/MIDI Settings.

▶ Multiple Audio Outputs

UVI Workstation is a multi-out instrument, offering 17 (main + 16) discrete stereo outputs. Most DAWs support multi-out instruments, see your specific DAWs user manual for more details.

Tips + Tricks

▶ UVI Workstation in a Sequencer

UVI Workstation is an audio instrument plug-in. Load UVI Workstation as an instrument plugin within your DAW, see your DAW's user manual for more information on working with virtual instruments plugins.

▶ Avoid Output Distortion

UVI Workstation allows a lot of user customizations. Check to see that your effects are not overboosting output and that multi-parts are not creating excessive gains. Remember to keep an eye on the output level of UVI Workstation.

▶ Avoid Excessive Sample Loading

As a general rule-of-thumb, avoid loading large amounts of samples that exceed 70% of your available RAM. For example, if you have 1 GB of RAM, do not load more than 700 MB into UVI Workstation.

▶ General Troubleshooting

Troubleshooting is always simplest and most effective when the exact problem can be specified clearly and concisely. If you are surprised by an error message or by seemingly erratic behavior in the program, take a moment to jot down the relevant details: exactly what the error message said (including any error ID numbers), what actions were done on-screen just before the problem occurred, what kind of file you were working with, how you recovered from the problem, and any unusual conditions. This may not enable you to solve the problem at once, but will greatly aid in isolating the problem should it reoccur.

If the problem you are encountering seems inconsistent, try to determine what the necessary pattern of actions are that will cause it to occur. Genuine bugs in application software like UVI Workstation are almost always consistent in their manifestation: the same set of actions under the same conditions invariably brings about the same results. Determining the exact cause of a bug often requires experiments which replicate the problem situation with one factor changed: choosing a different (smaller) preset, opening UVI Workstation in a different host application... If the problem is truly inconsistent, then it is likely to be a hardware problem: a bad hard drive, a failing computer motherboard...

Isolate the problem...

One of the best troubleshooting techniques is to try to isolate the problem. If you can whittle down a complicated setup or scenario to a much simpler case, chances are you'll zero in on the problem more quickly. For example, you could try running UVI Workstation in a different host application to see if the problem persists. If it does, it may have to do with the actual samples, presets, and/or performances being used.

Simplify your setup...

One of the most common causes of problems is a conflict with other software in the system. Run UVI Workstation by itself, with no other plugins or virtual instruments, and see if the problem you are having still occurs.

If you cannot open a particular UVI Workstation project or session in your host application...

First try opening other existing files, or a new file, to be sure the UVI Workstation is working at all. If other files work fine, try temporarily removing the UVI Workstation plug-in, or disable audio in your host application. If other files also exhibit similar behavior, then you know that the problem is not specific to one file.
